Definitions of **predict** on the Web:

- make a prediction about; tell in advance; "Call the outcome of an election"
- bode: indicate by signs; "These signs bode bad news"
wordnet.princeton.edu/perl/webwn
- • A prediction is a statement or claim that a particular event will occur in the future. The etymology of this word is Latin (from prae- "before" plus dicere "to say").
en.wikipedia.org/wiki/Predict
- To use a rule or principle to predict an outcome or to infer some consequence. It is not necessary that the rule or principle be stated.
www.adprima.com/verbs.htm
- The skill of explaining new events based on observations or information.
www.dpi.state.wi.us/standards/sciglos.html
- • Suggest what may happen based on available information
hsc.csu.edu.au/chemistry/glossary/2391/glossary.html
- • give a concise answer with no supporting statement required. Answer the question by making a logical connection between other pieces of information. Such information may be wholly given in the question or may depend on answers extracted in an earlier part of the question.
